

## About Us:

DTM Global began trading in January 2000.

Specialising in simulators and training solutions to improve combat effectiveness, mission planning, and tactical deployment. With technical and commercial agility, DTM delivers complex training and deployment solutions with continuity through long-term licensing and support contracts. The experienced team includes highly skilled software engineers, technical developers, graphic artists and project managers. DTM Global has become successful as a global supplier of major simulation and training tools in the defence sector.

DTM Global also has an **ISO 9001:2015 UKAS accredited** certification and is **Cyber Essentials (CE)** certified, which means that we can reduce project risk and guarantee quality.

## What is Fleetman?

Fleetman™, short for Fleet Manoeuvring, is an immersive maritime simulator featuring a high quality 3D environment.

## How does Fleetman™ work?

Fleetman™ is a comprehensive fully networked solution that brings a new dimension to maritime training. Designed to be versatile, you can create numerous scenarios by manipulating environmental variables:

- Weather Conditions: Set the stage by simulating a range of atmospheric elements.
- Time: Control the progression of time to enhance training realism.
- Sea State: Adjust sea conditions to replicate diverse maritime environments using the Beaufort scale.

The operation of Fleetman™ extends beyond its scenario-building capabilities:

- Replenishment At Sea (RAS): refining skills crucial for replenishing vessels during operations.
- Fleetwork Manoeuvring: Dynamic training scenarios that test fleet coordination and strategic manoeuvring in diverse operational contexts.
- Full integration with ECDIS and radars.

## How can Fleetman™ be used?

Fleetman™ offers multiple configurations tailored to your training needs; enabling use with any maritime training simulator:

1. Bridge Setup from 180° to 360°: Immerse trainees in realistic bridge environments through varied panoramic views.
2. Classroom Students & Instructor Setup: Engage in collaborative learning between students and instructors in an interactive educational environment.
3. Standalone Setup: Tailor training experiences for individual mastery, enabling trainees to delve deeply into the software at their own pace.

While Fleetman™ arrives with a fully functional off-the-shelf software suite, its true strength lies in its adaptability and it can be customised to your unique requirements.

## Customer Installations

Fleetman is used globally; notably in the **UK Royal Navy**

**Fleetworks™ Trainer.**

Other customers include:

**Royal Navy of Oman,  
Royal Saudi Naval Forces,  
Iraq Navy.**

## Aims and Uses

### What is the aim of the Fleetman™ Family?

Build team ethos and cohesion in your command teams and to develop new students in the art of ship handling

### What are the Fleetman™ Objectives?

The Fleetman™ family of simulator software is designed to develop a bridge command team from a benign ocean running environment to Full Mission Bridge Simulation

## Who can be trained?

- Junior Officers in training
- Junior Warfare Officers
- Navigating Officers
- Helmsman
- Communications Specialists
- Bridge lookouts
- Full Bridge Mission Teams
- Weapons Operators
